EDUCATION

University of Alberta
Edmonton, Alberta

Full Stack Web Development

Expected Completion, Sep 2026

- **Concentrations:** Full Stack Web Development
- **Related Coursework:** React, Next.js (including Server-Side Rendering), JavaScript, TypeScript, C#/Python, .NET/Django, REST APIs, Git, MySQL, Database Design & ER Diagrams, SWR, UI Design with Tailwind CSS & ShadCN, MUI, Version Control & Team Collaboration, Accessibility (AODA), , Object-Oriented Programming.

EXPERIENCE

Freelance Web Developer
Remote

Self-employed · (During High School)
Nov 2022

Oct 2022 –

- Consulted with non-technical clients to design and deliver responsive websites.
- Built UIs using HTML, CSS, and JavaScript, applying accessibility-first design.
- Created mockups, navigation flows, and performed testing/QA for client deliverables.

PROJECTS

[Fitcheck](#) [Live Demo](#) [Github](#)

Creator & Developer · Solo Project

May 2025– June 2025

- Engineered real-time markdown-based reviews from raw GitHub repos using OpenAI APIs (streaming completion)
- Developed recursive async file crawler to selectively fetch code by file extension using GitHub REST API v3.
- Implemented rate limiting, secure API middleware, and error handling for production safety.
- Custom React Hooks and unit tests (Jest) for scalable, reusable data fetching logic.
- Prioritized UX/UI with responsive design, accessible elements, mobile-first layouts, and component-driven architecture.
- Optimized performance using SWR cache strategies, async loading states, and lazy rendering.
- Integrated GPT-4o via Vercel AI SDK for real-time GenAI reviews.

[PokeXplorer](#) [Live Demo](#) [Github](#)

Creator & Developer · Solo Project

March 2025

- Built from scratch using **HTML5, CSS3, and vanilla JavaScript**; focused on responsive UI and **website layout design**
- **Organized and displayed data-rich content:** color-coded stat cards, animated evolution stages, and sprite interaction
- Implemented **mobile-first flow**, responsive grid systems, and basic search error validation
- Applied **web accessibility guidelines**, performance best practices, and basic SEO techniques
- Conducted manual **quality testing** for layout, device responsiveness, and keyboard navigation

CERTIFICATIONS

- **Harvard CS50 – Introduction to Computer Science** Jan 2026
Covers programming foundations in C, Python, web development, data structures, and software engineering concepts.
- **FreecodeCamp — Responsive Web Design** July 2024
Mastered Flexbox, Grid, semantic HTML and accessibility-first design.
- **FreecodeCamp — JavaScript Algorithms and Data Structures.** Sept 2024
Implemented core algorithms, recursion, and practiced clean code principles using vanilla JS.

SKILLS

Languages: C, C#, JavaScript, TypeScript, Python, HTML, CSS, MySQL, SQLite

Frameworks & Libraries: React.js, Next.js, Flask, Tailwind CSS, Bootstrap

UI/UX Components & Animation: ShadCN/UI, Radix UI, MUI, Framer Motion, GSAP

Tools, Technologies & AI Development: Git, GitHub, Vercel (AI SDK), RESTful APIs, OpenAI API (GPT-4o), Prompt Engineering, Streaming LLM Responses, Figma

Testing & Optimization: Jest (React Hooks), Storybook, Lighthouse, DevTools, Responsive & Accessibility Testing

Other Technical Skills: Version Control & Team Collaboration (Git workflow), Component-Driven Development, SEO, Real-Time Data Handling (Streaming API)
